Mathematical Sciences Undergraduate Awards Committee:

I am writing this letter of support of Alex Stoll to receive an undergraduate award in the Mathematical Sciences department. Alex is a senior in the department and was a student of mine in STAT 3300 during the spring 2016 semester.

Alex remains one of the top students that I have taught in this course. This was not only evident on his performance on assignments and exams but on his curiosity about the material. He was a pleasure to teach.

Alex is extremely well rounded. He not only excelled in the classroom as illustrated by his high GPA but he has worked as a grader in the department. In addition, Alex participated as an undergraduate researcher at Valparaiso University during summer 2015 and at the University of West Georgia during summer 2016. Both experiences resulted in multiple papers and presentations at the 2016 and 2017 Joint Mathematics meetings. At the 2016 meeting, Alex was awarded the Outstanding Student Presenter award. During the fall 2016 semester, Alex participated in a study abroad program, Budapest Semesters in Mathematics.

I enthusiastically recommend Alex Stoll for an undergraduate award in the Department of Mathematical Sciences.

Sincerely,

*Rose Martinez-Dawson*

Rose Martinez-Dawson, Ph.D.

Senior Lecturer

Department of Mathematical Sciences
