Undergraduate Departmental Awards Nominations

To Whom It May Concern:

It is my pleasure to nominate Evan Branyon for an Undergraduate Department Award. Evan was a student of mine in a section of Multivariable Calculus (MATH 2060). I have taught hundreds of students during my time at Clemson University, and Evan stands out as one of the most dedicated. He displayed an aptitude for the material, a desire to learn, and an outstanding work ethic. He worked diligently on every assignment. He never hesitated to ask for guidance when needed and participated fully in every class, as his primary goal was always to understand the material.

Evan has a broad range of mathematical interests. He frequented my office to discuss a variety of mathematical topics and to borrow books that piqued his interest. He is inquisitive and an excellent problem solver. My ideal would be to have a class full of students like Evan. He was a joy to teach. Of course, these qualities make him an excellent role model for other students.

I encourage the committee to consider awarding Evan Branyon an undergraduate departmental award.

Sincerely,

Terri A. Johnson
Retired Senior Lecturer
Department of Mathematical Sciences
