Coordinator of Undergraduate Studies:

I am writing to recommend **Robert Melville** for a Math Sciences award. I have known Robert since the beginning of fall semester 2017. He has taken two Math 4820 (undergraduate research) courses with me. In both of these classes, he played a key role. The first time he was the leader of a group of students who presented their work at an undergraduate research conference at the University of Tennessee. The second time he was able to solve a challenging problem. This result will appear in a paper which we plan to submit this semester. Robert is a good citizen in the department. He is helpful, pleasant, fun and encouraging to others. Robert is a gifted mathematician. I am fairly sure that he has earned an A in every course he has taken here.

Sincerely,

Beth Novick
